

The following preventive services and immunizations do not apply to all health plans administered or insured by Blue Cross and Blue Shield of Alabama. Some or all of the contraceptive methods or prescription drugs listed may not be covered under the plan because of the employer's religious beliefs. To find out if contraceptive methods and prescription drugs are excluded, please contact Customer Service for additional information.

If the preventive services section of your plan's benefit booklet refers you to **AlabamaBlue.com**, the preventive services and immunizations listed below will be covered by your plan. However, your group may decide to delay the effective date for coverage until your group's plan year for any new preventive services and immunizations recently added to this list. If your plan covers these services, please be aware that in some cases, routine preventive services and routine immunizations may be billed separately from your office or other facility visit. In that case, the applicable office visit or outpatient facility copayments described in the physician benefits and outpatient hospital benefits sections of your benefit booklet may apply. In any case, applicable office visit or facility copayments may still apply when the primary purpose for your visit is not routine preventive services and/or routine immunizations. **Please ask the provider to contact your Health Plan to verify the procedure and diagnosis codes that are covered under these preventive services.** If you have any questions about your plan's benefits, you may also call our Customer Service Department at the number on the back of your ID card.

*Contact your group benefit administrator for information regarding the effective date of new preventive services and immunization recently added to the list below*
