Blue Cross and Blue Shield of Alabama Part III Actuarial Memorandum and Certification Individual Market Effective January 1, 2023

Section 1: General Information

This actuarial memorandum has been revised to reflect changes due to the recent passage of the Inflation Reduction Act, which extended to 2025 the Enhanced Advanced Premium Tax Credit (APTC) amounts that were previously made available in 2021 and 2022 through the American Rescue Plan Act (ARPA). Revisions were made to sections 1, 2, 5, 6, 7, 11, 12, 13, 15, 16, 17, 18, 19, and 21.

This revised actuarial memorandum and corresponding actuarial certifications are submitted in support of the United States Department of Health and Human Services' ("HHS") "Part III: Actuarial Memorandum and Certification Instructions" described in the "2023 Unified Rate Review Instructions, Rate Filing Justification: Parts I, II, and III." This document provides information related to "Part I: Unified Rate Review Template" ("URRT") for Blue Cross and Blue Shield of Alabama's ("BCBSAL") non-grandfathered, Individual Market health plans for rates effective January 1, 2023.

This memorandum contains data, analyses, and explanations supporting the assumptions and methodology used in the premium rate development for products in the Individual Market. This includes specific support of the inputs and underlying assumptions used to populate the URRT. The contents of the memorandum are intended to demonstrate the reasonableness of the resulting Individual Market premium rates, as well as document that those rates have been developed in compliance with the market rating rules as established under the Affordable Care Act ("ACA") and in accordance with sound actuarial principles.

This memorandum generally follows the format outlined in the aforementioned HHS instructions.

General Information

Exhibits 1.1 and 1.2 provide identifying information and primary contact information.

Health Benefit Plans

Exhibit 1.3 provides information about the plans to which this Actuarial Memorandum applies. For the remainder of this Memorandum, only Plan Names are referenced.

HIOS Issuer ID: 46944 4 of 90

Section 2: Proposed Rate Change(s)

BCBSAL proposes an average -0.3% change to rates.

The average rate changes vary by plan and range from -2.3% for Blue Protect to 0.6% for Blue HSA Gold.

The main considerations for the proposed rate changes are:

- Projected medical inflation and utilization as indicated in Section 5: Trend Factors,
- Anticipated changes in the average morbidity of the covered population as indicated in Section 6: Morbidity Adjustment, and
- Emerging 2022 experience, less adverse than expected.

Other factors affecting the proposed rates are:

- The estimated impact of COVID-19,
- Projected risk adjustment transfers,
- Changes in member cost sharing (varies by plan),
- •
- The projection of the required Cost Sharing Reduction (CSR) Adjustment factor.

HIOS Issuer ID: 46944 5 of 90

Exhibit 2.1 provides the components of the average rate change. While the 2023 premium rates were not developed using the method shown in Exhibit 2.1, it is provided for illustrative purposes, and as a reasonableness check of the overall average rate change. Please note that the components of the total required rate change as shown in Exhibit 2.1 are multiplicative rather than additive and unrounded values were used in the calculation.

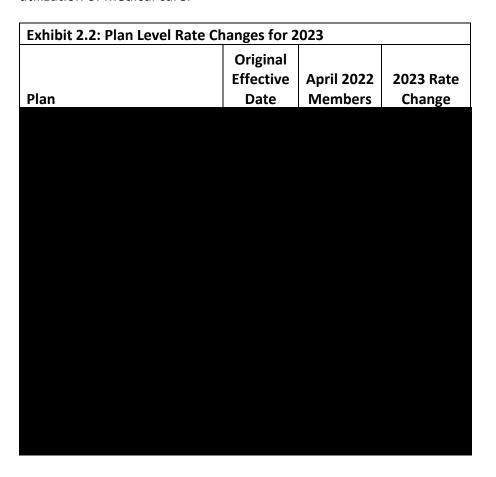

| Exhibit 2.1: Components of Rate Change | |

| Premiums | -0.3/0 |

HIOS Issuer ID: 46944 6 of 90

Plan Level Rate Changes

The requested rate change is not the same across all products and plans. The plan level rate changes shown in Exhibit 2.2 reflect the impact of cost sharing changes for each plan and the change in the CSR adjustment factors. Such rate variation by plan reflects neither potential nor existing differences in morbidity.

The cost sharing changes made to these plans are intended to maintain Actuarial Values ("AVs") within the appropriate *de minimis* ranges and to keep up with changes in the cost and utilization of medical care.

The rate changes by plan are based on the rating area 3, Birmingham-Hoover, AL MSA, 21 year old, non-tobacco premium rates in 2022 and 2023. The average rate change across all plans is calculated by taking the weighted average of 2022 and 2023 rates by plan for a 21 year old, using the April 2022 members by plan as weights.

HIOS Issuer ID: 46944 7 of 90

Exhibit 2.3 below shows the 21 year old, rating area 3, non-tobacco rates and rate changes by plan.

| Exhibit 2.3: Plan Level Rate Changes for 2023 | | | |

HIOS Issuer ID: 46944 8 of 90

Section 3: Experience and Current Period Premium, Claims, and Enrollment

Experience for the Single Risk Pool during the experience period reported in Worksheet 1, Section I, of URRT, includes all non-grandfathered health plans in the Individual Market.

Experience Period

12 months of calendar year 2021 based on the claim incurred date

Experience Period Paid Through Date

May 31, 2022

Current Date

Current enrollment and premium found in Section 2 of Worksheet 2 is reported as of April 30, 2022.

Premiums (net of MLR Rebate) in Experience Period

The reported premium in Section I of Worksheet 1 of

- 1. Reflects premiums earned during the experience period by BCBSAL,
- 2. Does not reflect any reductions prescribed by HHS when calculating BCBSAL's MLR, such as taxes and assessments,
- 3. Does not reflect risk adjustment payables or receivables, and
- 4. Does not reflect MLR rebates.

Allowed and Incurred Claims Incurred During the Experience Period

When estimating Incurred but not Paid ("IBNP") for URRT, BCBSAL varied the methodology across three claim classifications. Each methodology, where appropriate, used historical claim data from BCBSAL's Individual non-grandfathered block of business.

(1) Initial Claims (overwhelming majority of URRT incurred claims)

IBNP was estimated by applying completion factors to experience period claims where completion factors were based on the Development (or Lag) Method referenced in paragraphs 2.5 and 3.4.1 of Actuarial Standard of Practice No. 5, "Incurred Health and Disability Claims."

A separate set of completion factors was developed for each incurred month during the experience period for each of the following benefit categories.

- (a) Inpatient Hospital,
- (b) Outpatient Hospital,
- (c) Professional,
- (d) Other Medical, and
- (e) Prescription Drugs.

HIOS Issuer ID: 46944 9 of 90

Allowed claims were developed by combining incurred claims with member cost sharing.

Allowed claims and incurred claims used the same set of completion factors.

(2) Drug and Medical Rebates (magnitude approximately of URRT incurred claims)

IBNP was estimated by subtracting actual rebates paid from ultimate rebates. Ultimate rebates were derived by applying completion factors to actual rebates.

(3) Capitation Payments (magnitude less than of URRT incurred claims)

IBNP is \$0.

For Rebates and Capitation Payments, allowed claims equal incurred claims.

Regardless of classification, all claims are combined within the six benefit categories listed in Section 2, of Worksheet 1, of the URRT.

The resulting IBNP estimates are neither unusually high nor unusually low relative to historical levels as completion factors were developed as a function of historical completion rates applied to the experience period claims.

As expected, the IBNP estimate is stable given the experience period is calendar year 2021 with claims paid through May 31, 2022, the large size of the block of business, and the historical consistency of the claims processing system.

Exhibit 3.1 shows incurred claims during the experience period by Benefit Category. The total of equals that of "Incurred Claims in Experience Period," from Section I, of Worksheet 1, of URRT.

Exhibit 3.2 shows allowed claims during the experience period by Benefit Category. The total of equals that of "Allowed Claims," from Section I, of Worksheet 1, of URRT.

Exhibit 3.3 shows the column heading definitions.

While incurred claims and allowed claims used the same completion factors, the year 2021 completion factor for a benefit category may differ between Exhibit 3.1 and Exhibit 3.2 because:

(1) For the classification of "Initial Claims," completion factors were derived and applied separately for each incurred month within 2021. To the extent that incurred claims and allowed claims are distributed differently across months, the overall completion factor will differ between incurred claims and allowed claims, and

HIOS Issuer ID: 46944 10 of 90

(2) For all other classifications incurred claims and allowed claims are equal. By mixing these claims with claims associated with "Initial Claims" within a benefit category, the overall completion factor will differ for incurred claims and allowed claims.

The benefit category of Prescription Drug has a sizable amount of "Out System" claims. These "Out System" claims are comprised of drug rebates and drug claims adjudicated by the Pharmacy Benefit Manager (PBM).

| Exhibit 3.1: Incurred | Exhibit 3.1: Incurred Claims | | | | |
|-----------------------|------------------------------|------------|------|-------|----------------------|
| Benefit Category | In System | Out System | IBNP | Total | Completion Factor |

| Capitation | | | | | |
| Prescription Drug | | | | | |
| Total | | | | | |

| Exhibit 3.3: Column Heading Definitions | | | |
|---|---|--|--|
| Heading | Definition | | |
| In System | Claims processed through BCBSAL's claim system | | |
| Out System | Claims processed outside of BCBSAL's claim system | | |
| IBNP | 2021 Claims incurred but not paid as of 05/31/2022 which is the sum of "Reported but Unpaid," and "Incurred but not Reported." IBNP is the total of IBNP from "In System" and "Out System." | | |
| Total | = In System + Out System + IBNP; ultimate claims | | |
| Completion Factor | = (In System + Out System) / Total; paid claims as a % of ultimate claims | | |

HIOS Issuer ID: 46944 11 of 90

The Appendix provides the 2021 Supplemental Health Care Exhibits of BCBSAL's 2021 Annual filing. The data in the Appendix do not equal the experience period data (year 2021) used in the URRT in the development of 2023 rates due to differences in requirements, instructions, and timing. For example, the URRT excludes Grandfathered coverages which are included in the Supplemental Health Care Exhibits.

HIOS Issuer ID: 46944 12 of 90

Section 4: Benefit Categories

Claims in the experience period were assigned to one of the following categories based on indicators (e.g. location of service, type service, claim form UB04/CMS 1500, etc.) associated with the claim data. These assignments mostly follow the definitions given below.

Inpatient Hospital (Utilization Unit: Days)

Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, and other services provided in a facility setting on an inpatient basis and billed by the facility.

Outpatient Hospital (Utilization Unit: Services)

Includes non-capitated facility services for surgery, emergency room, lab, radiology, therapy, observation and other services provided in a facility setting on an outpatient basis and billed by the facility.

Professional (Utilization Unit: Services)

Includes non-capitated primary care, specialist, laboratory, radiology, and other professional services that are billed directly by the provider.

Other Medical (Utilization Unit: Services)

Includes non-capitated ambulance, home health care, therapy, DME, chiropractic, prosthetics, supplies, and other services as well as all out-of-network services.

Capitation (Utilization Unit: Benefit Period)

Includes all services provided under capitated arrangements.

Prescription Drug (Utilization Unit: Prescriptions)

Includes drugs dispensed by a pharmacy. This amount is net of rebates received from Pharmacy Benefit Manager.

HIOS Issuer ID: 46944 13 of 90

Section 5: Trend Factors

BCBSAL cost and utilization projection trends by benefit category are determined by examining:

- experience trends,
- provider reimbursement arrangements,
- utilization patterns by benefit category, and
- any pending changes for reimbursement or utilization.

BCBSAL also made the assumption that 2022 COVID-19 claims would be reduced from 2021 and that COVID-19 claims would be further reduced in 2023.

Exhibit 5.1 shows the components of trend broken into Year 1 (2022) and Year 2 (2023). Trends were selected using actuarial judgement with considerations for changes in demographics, benefits, seasonality, and one-time events. The rating trends in this section do include the impact of COVID-19, and therefore no separate adjustment for COVID-19 is made in this filing.

| Exhibit 5.1 Underlying Trend Factor Development | | | | |
|---|-------------------------|--|-------------|--------------|
| | Year 1 Trend | | Year | 2 Trend |
| | January - December 2022 | | January - D | ecember 2023 |
| Benefit Category | Cost Utilization | | Cost | Utilization |
| Inpatient | | | | |
| Outpatient | | | | |
| Professional | | | | |
| Other Medical | | | | |
| Capitation | | | | |
| Prescription Drug | | | | |
| Composite | | | | |

Since the current URRT instructions do not define a methodology for reflecting the change in allowed cost due to the expected shift in distribution of members by product between the experience period and the projection period, BCBSAL elected to adjust the underlying utilization trends for all benefit categories excluding Capitation. Exhibit 5.2 shows the calculation for the value of the change in product mix. The allowed relativities used were derived from the Milliman Managed Care Rating Model, which was calibrated to BCBSAL's Individual experience.

Section 6: Morbidity and Other Adjustments

Morbidity Adjustment

BCBSAL developed the expected Individual Market morbidity factor for 2023 based on available data on Individual Market members through May 2022. The following is the list of considerations that went into the morbidity factor development.

2021 to 2022 considerations

2022 to 2023 considerations

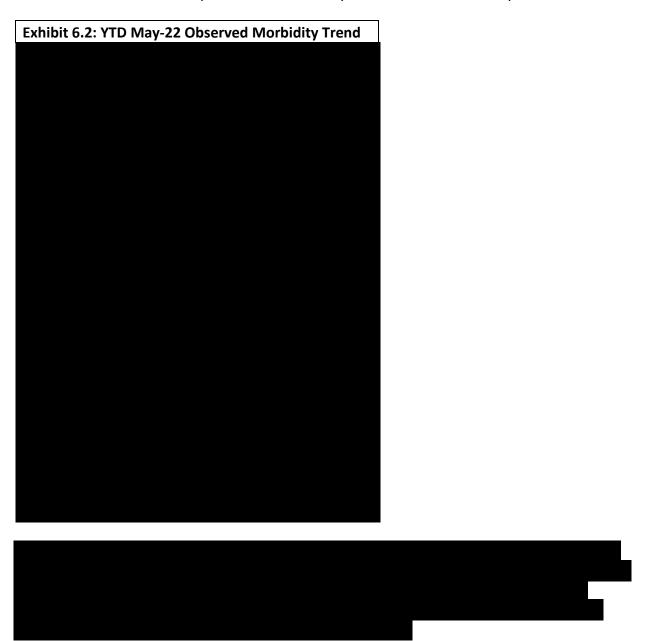

A high level summary of the morbidity factor development is shown in Exhibit 6.1.

| Exhibit 6.1: Projected Morbidity Factor | | | | |
|---|--|--|--|--|
| Factor | | | | |
| 2022 vs 2021 Morbidity Factor | | | | |
| 2023 vs 2022 Morbidity Factor | | | | |
| Total Morbidity Factor | | | | |

HIOS Issuer ID: 46944 17 of 90

For 2022, BCBSAL derived a morbidity trend of using experience through May 2022. Exhibit 6.2 shows the development of the YTD May 2022 observed morbidity.

HIOS Issuer ID: 46944 18 of 90

Exhibit 6.3 shows the development of the change in morbidity trend for 2022 and Exhibit 6.4 shows the full year of morbidity trend for 2022.

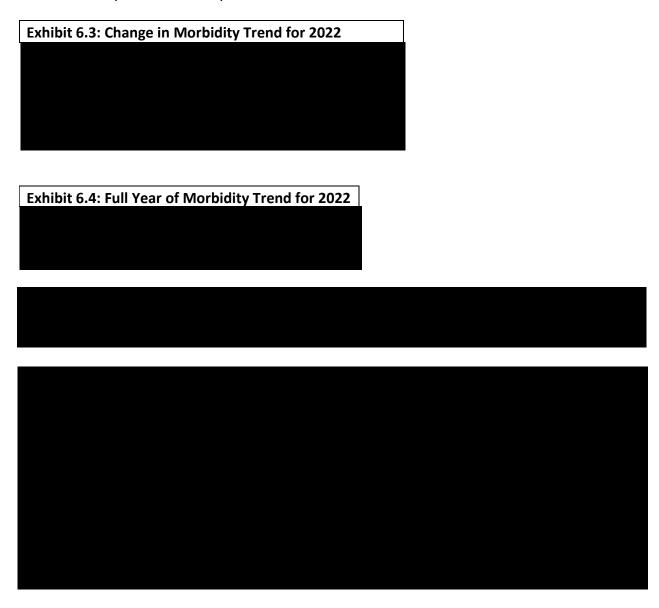

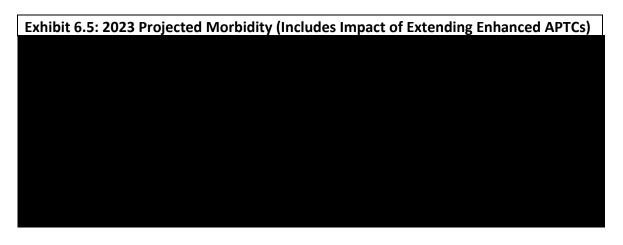

Exhibit 6.5 shows the projected morbidity impact of the enhanced APTCs ending

HIOS Issuer ID: 46944 19 of 90

Other Adjustments

BCBSAL is not making any adjustments to this filing that are not otherwise and elsewhere addressed in this rate development.

Consequently, the Other factor used in Section II of Worksheet 1 is 1.000.

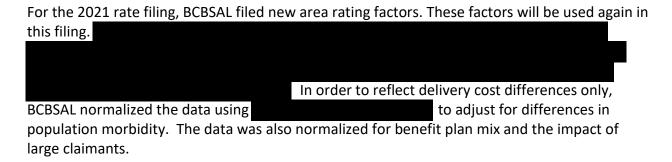

HIOS Issuer ID: 46944 20 of 90

Section 7: Demographic Shift

Demographic changes were estimated using BCBSAL's geographic area factors, the age curve described in the paragraph immediately preceding Exhibit 18.2, and other rating factors along with projected member months.

Area Factor Adjustment

The rating areas used are the Alabama geographic rating areas listed in Appendix A of the State of Alabama Department of Insurance Bulletin No. 2013-04.

BCBSAL also considered the following:

- Geographic proximity of rating areas,
- Consistency of the data across the
- The resulting rate impact for renewing policies from changing the area factors.

HIOS Issuer ID: 46944 21 of 90

Exhibit 7.1 shows the numerical development of the "2021 Experience Period Average Area Factor" of which was developed as the weighted average of the "Area Factors" using the 2021 membership across rating areas as weights.

Exhibit 7.1 also shows the numerical development of the "2023 Projection Period Average Area Factor" of which was developed as the weighted average of the "Area Factors" using the projected 2023 membership across rating areas as weights.

| Exhibit 7.1: Area Factor Adjustment | | | | | | |
|--|----------------|-----------------|---|--|--|--|
| MSA | Rating Area | Area Factors | Actual 2021 Enrollment Distribution | Projected 2023 Enrollment Distribution | | |
| Anniston-Oxford, AL | Rating Area 1 | | | | | |
| Auburn-Opelika, AL | Rating Area 2 | | | | | |

| 2023 Projection Period Average Area Factor | | | | | | |
| Area Factor Adjustment | | | | | | |

HIOS Issuer ID: 46944 22 of 90

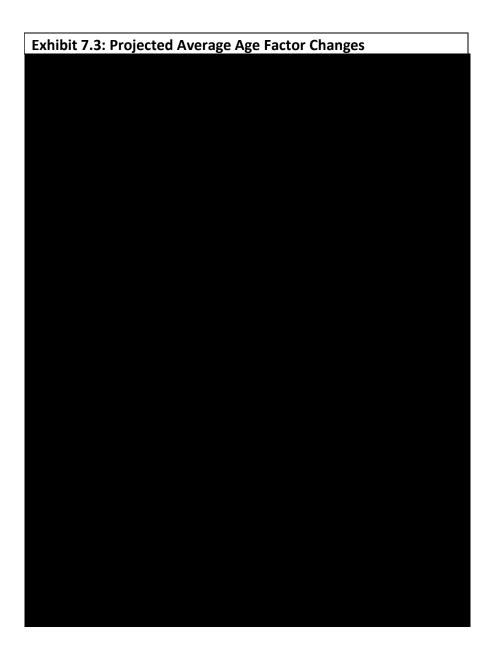

Age Factor Adjustment

BCBSAL used the age curve described in the paragraph immediately preceding Exhibit 18.2 in calculating the average age factor for both the experience period and the projection period. The average age factor for the projection period was calculated by analyzing historical membership, average age factor, and monthly percentage change in average age. This development can be seen in Exhibits 7.2 and 7.3.

In the exhibits, the Monthly Change is the actual change in the average age factor by month. BCBSAL used the Monthly Change impact in the historical data as a basis for the Monthly Change impact in the projected data. The 2023 projection period average age factor is a weighted average of the projected monthly average age factor and the projected total enrollment by month.

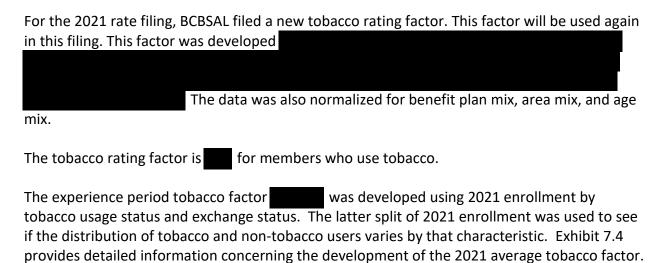

HIOS Issuer ID: 46944 23 of 90

HIOS Issuer ID: 46944 24 of 90

Tobacco Factor Adjustment

| Exhibit 7.4: 2021 Experience Period Average Tobacco Factor | | | | | | | |
|--|-----------------------------|------------------|--------------|--|--|--|--|
| Tobacco User | Exchange Status | Member Months | Tobacco User | | | | |
| Yes | On Exchange | | | | | | |
| No | On Exchange | | | | | | |
| Yes | Off Exchange | | | | | | |
| No | Off Exchange | | | | | | |
| 2021 Average Tob | 2021 Average Tobacco Factor | | | | | | |
| % of Total Enrollment on Exchange | | | | | | | |
| 2021 On Exchange % Tobacco User | | | | | | | |
| 2021 Off Exchange | e % Tobacco User | | | | | | |

BCBSAL used experience data showing the average percentage of tobacco users by year for On Exchange vs. Off Exchange to make assumptions about this distribution for 2023. Results are shown in Exhibit 7.5.

| Exhibit 7.5: Percentage of Tobacco Users | | | | | | |
|--|--------------------------|--|--|--|--|--|
| Year | On Exchange Off Exchange | | | | | |
| 2018 | | | | | | |
| 2019 | | | | | | |
| 2020 | | | | | | |
| 2021 | | | | | | |
| 2022 (Jan-Apr) | | | | | | |
| 2023 (assumed) | | | | | | |

HIOS Issuer ID: 46944 25 of 90

The projection period tobacco factor was developed by combining the assumptions above for percentage of tobacco users and BCBSAL's projected 2023 enrollment by on exchange and off exchange. The numerical development for the 2023 projected average tobacco factor can be found in Exhibit 7.6.

| Exhibit 7.6: 2023 Projection Period Average Tobacco Factor | | | | | | |
|--|-----------------------------------|---------------|--------------|--|--|--|
| Tobacco User | Exchange Status | Member Months | Tobacco User | | | |
| Yes | On Exchange | | | | | |
| No | On Exchange | | | | | |
| Yes | Off Exchange | | | | | |
| No | Off Exchange | | | | | |
| 2023 Average Tobacco Factor | | | | | | |
| % of Total Enro | % of Total Enrollment on Exchange | | | | | |
| 2023 On Exchar | 2023 On Exchange % Tobacco User | | | | | |
| 2023 Off Exchai | nge % Tobacco Use | | | | | |

The calculation for the tobacco factor adjustment was done by dividing the 2023 average tobacco factor by the 2021 average tobacco factor and can be found in Exhibit 7.7.

Section 8: Plan Design Changes

From the experience period to the projection period, BCBSAL made changes to cost sharing requirements to each plan.

These changes were implemented to:

- (1) Maintain Actuarial Values within de minimis ranges,
- (2) Reflect changes in regulations, and/or
- (3) Reflect changes in the cost and utilization of medical care.

The value of these changes for each plan was calculated by using the Milliman Managed Care Rating Model, which was calibrated to BCBSAL's Individual experience.

More specifically, the Milliman Managed Care Rating Model was used to model both the 2021 and 2023 benefits. The difference between these two values is the difference due only to the change in cost sharing and can be seen in Exhibit 8.1.

| Exhibit 8.1: Value of Cost Sharing Changes from 2021 to 2023 by Plan | | | | | |
|--|--------------|--------------|-------------------|--|--|
| | 2021 Modeled | 2023 Modeled | Value of Cost | | |

Section 9: Manual Rate Adjustments

No manual rate adjustment was needed as BCBSAL's experience period claims are deemed fully credible as discussed in Section 10: Credibility of Experience.

HIOS Issuer ID: 46944 29 of 90

Section 10: Credibility of Experience

BCBSAL has assigned full credibility to the Base Period Experience in the Individual URRT as this experience is comprised of member months in 2021.

This assignment of full credibility "without using a rigorous mathematical model" is consistent relative to Actuarial Standards of Practice No. 25 Credibility Procedures, specifically section 3.4, "Professional Judgment," which states, "...in some situations, an acceptable procedure for blending the subject experience with the relevant experience may be based on the actuary assigning full, partial, or zero credibility to the subject experience without using a rigorous mathematical model."

HIOS Issuer ID: 46944 30 of 90

Section 11: Establishing the Index Rate

Information contained in the section may not calculate exactly to the final results indicated due to rounding.

Experience Period Index Rate

Exhibit 11.1 provides details around the development of BCBSAL's 2021 Individual ACA Index Rate.

| Exhibit 11.1: Calculation of Experience Period Index Rate | | | | | | |
|---|-------------------|-------------|------------------|-------------------|--------------|---|
| | A | В | С | D = B / C * 12000 | E = A / B | F = D * E / 12000 |
| Benefit Category | Allowed Claims | Utilization | Member Months | Utilization/1000 | Cost/Service | Experience Period Index Rate PMPM |
| Inpatient Hospital | | | | | | |
| Outpatient Hospital | | | | | | |
| Professional | | | | | | |
| Other Medical | | | | | | |
| Capitation | | | | | | |
| Prescription Drug | | | | | | |
| Total | | | | | | |

The Index Rate equals the allowed claims PMPM from the experience period less non-EHB claims (\$0.00 PMPM). There were no non-EHBs covered in the experience period.

Experience Period Index Rate PMPM =

HIOS Issuer ID: 46944 31 of 90

Projection Period Index Rate

BCBSAL applied the Trend Factors from Exhibit 5.3 to the Experience Period PMPM for EHB in Exhibit 11.2 to develop the Trended EHB Allowed Claims PMPM.

| Exhibit 11.2: Trending EHB Allowed Claims PMPM | | | | | | |
|--|----------------------|-------------|-------------|-------------|-------------|-----------------------|
| | Α | В | С | D | E | F = A * B * C * D * E |
| | Experience Period | | Year 1 | | Year 2 | Trended EHB |
| - C: | Index Rate | Year 1 Cost | Utilization | Year 2 Cost | Utilization | Allowed Claims |
| Benefit Category | PMPM | Trend | Trend | Trend | Trend | PMPM |
| Inpatient Hospital | | | | | | |
| Outpatient Hospital | | | | | | |
| Professional | | | | | | |
| Other Medical | | | | | | |
| Capitation | | | | | | |
| Prescription Drug | | | | | | |
| Total | | | | | | |

- The Cost and Utilization Trend factors are applied for 12 months each, covering the 24 months from mid-point of the experience period to mid-point of the projection period.
- For example, Trended EHB Allowed Claims PMPM for Outpatient is calculated as follows:

HIOS Issuer ID: 46944 32 of 90

BCBSAL applied the Projection Factors listed below, and shown in Exhibit 11.3, to the Trended EHB Allowed Claims PMPM to develop the Projection Period Index Rate.

Morbidity Adjustment: Section 6: Morbidity and Other Adjustment, Exhibit 6.1,

• Demographic Shift: Section 7: Demographic Shift, Exhibit 7.8,

Impact of Plan Design Changes: Section 8: Plan Design Changes, Exhibit 8.2, and
 Other: Section 6: Morbidity and Other Adjustment.

| Exhibit 11.3: Calculation of Projection Period Index Rate | | | |
|---|--|--|--|
| Trended EHB Allowed Claims PMPM | | | |
| Morbidity Adjustment | | | |
| Demographic Shift | | | |
| Plan Design Changes | | | |
| Other | | | |
| Projection Period Index Rate | | | |
| | | | |

There will be no non-EHBs covered in the Individual Market during 2023, and as described in Section 10, BCBSAL has assigned full credibility to its base period experience and no manual rate adjustment is necessary. Therefore, the Index Rate for the Projection Period is also

The Trended EHB Allowed Claims PMPM in Exhibit 11.2 and the Projected Index Rate in Exhibit 11.3 may not match exactly to the Trended EHB Allowed Claims PMPM and the Projected Index Rate in the URRT due to URRT rounding requirements.

HIOS Issuer ID: 46944 33 of 90

Section 12: Development of the Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the index rate adjusted for all allowable market-wide modifiers, including reinsurance, risk adjustment, and the exchange user fee adjustment. This calculation is shown in Exhibit 12.1. The Market Adjusted Index Rate in Exhibit 12.1 does not match exactly to the Market Adjusted Index Rate in the URRT due to URRT rounding requirements.

| Exhibit 12.1: Calculation of 2023 Marke | et Adjusted Index Rate |
|---|------------------------|
| Projected 2023 Index Rate | |
| Reinsurance | |
| Risk Adjustment Payment/Charge | |
| Exchange User Fee Adjustment | |
| Market Adjusted Index Rate | |
| | |

Reinsurance

There are no expected reinsurance recoveries for 2023.

Experience Period Risk Adjustment

The risk adjustment transfer for the 2021 BCBSAL Individual Market is listed in Exhibit 12.2. This amount, which BCBSAL will receive for 2021 net of High-Cost Risk Pool payments and charges, is a compilation of applicable items provided by CMS on 06/30/2022.

| Exhibit 1 | Exhibit 12.2: 2021 Risk Adjustment Transfer | | | | |
|---------------|---|------------------|------------------------|--|--|
| Member Months | | Transfer Payment | Transfer on PMPM Basis | | |
| | | \$6,002,162 | | | |

Projected Risk Adjustment PMPM

BCBSAL expects a recovery of PMPM in 2023 from the risk adjustment program, based on the following:

HIOS Issuer ID: 46944 34 of 90

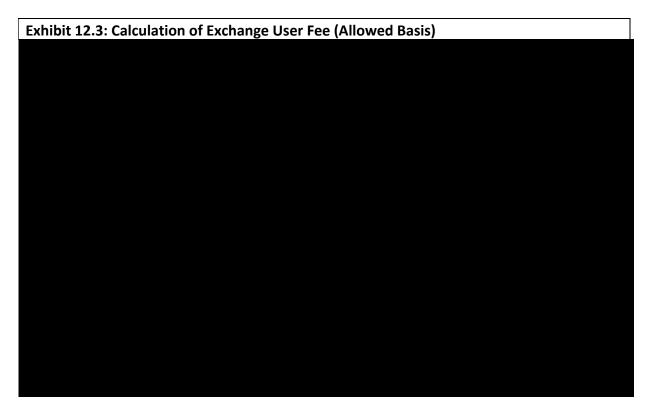

- Per the instructions outlined in the 2023 HHS Final Notice of Benefit and Payment Parameters, risk adjustment transfers will be reduced by 25 percent in the Alabama Individual Market for the 2023 benefit year.
- BCBSAL does not anticipate any Risk Adjustment Data Validation Charges or Default Data Validation Charges.

| • | Risk adjustment transfers will be altered for high-cost enrollees in 2023. Individual |
|---|---|
| | Market issuers will be reimbursed for 60% of paid claims in excess of \$1 million for any |
| | such enrollees, while all Individual Market issuers nationwide will be assessed a small |
| | uniform percent of premium |
| | |
| | |

| In the develop | oment of the market adjusted index ra | ate, the expected risk adjustme | ent transfer |
|----------------|---|---------------------------------|----------------|
| will be applie | d to the index rate on an allowed clair | ns basis. To calculate the | allowed |
| PMPM, the ri | sk adjustment transfer estimate | PMPM was divided by the pa | aid to allowed |
| ratio | developed in Exhibit 13.3 | | |

Exchange User Fee

The exchange user fee adjustment in the Market Adjusted Index Rate calculation is on an allowed basis. The exchange user fee on an incurred basis is of premium. Exhibit 12.3 provides the detailed development of the exchange user fee on an allowed basis.

HIOS Issuer ID: 46944 35 of 90

Section 13: Actuarial Value and Cost Sharing

Induced Utilization Adjustment Factors

The induced utilization adjustment factors are used to account for the expected utilization differences due to differences in cost sharing. They are the induced utilization of the plan relative to the induced utilization of the total Individual Market. These factors were developed using the Milliman Managed Care Rating Model using a standard population and claims experience normalized for risk, area, network, and large claims. This demonstrates the expected utilization differences due to cost-sharing factors alone, independent of health status. Induced Utilization factors are shown in column C of Exhibit 16.1.

Paid to Allowed Adjustment Factors

The 2023 average paid to allowed factor is calculated by projecting paid to allowed ratios and allowed PMPMs by plan. Unrounded values were used throughout this section.

Exhibit 13.1 shows the development of the each plan's Projected 2023 Paid to Allowed Ratio. The paid amount used in this development assumes all members are on the non-CSR Variation plan.

| | A | В | C | D | $E = A \times B \times C \times C$ |
|-----------|---------------|------------|--------------|-----------|------------------------------------|
| | 2021 (Actual) | | Estimated | Estimated | |
| | Paid to | Estimated | Impact of | Impact of | Projected 2023 |
| | Allowed | Impact of | Cost Sharing | Change in | Paid to |
| Plan Name | Ratio | Leveraging | Changes | Morbidity | Allowed Ratio |
| | | | | | |
| | | | | | |

| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

2021 (Actual) Allowed PMPMs shown in Exhibit 13.2 were adjusted for trend, cost sharing changes, and morbidity in order to project to a 2023 allowed PMPM basis. The trend factor (column B) applies two years of the composite trend factor. The impact of cost sharing changes (column C) was derived from the Milliman Managed Care Rating Model, which was calibrated to BCBSAL's Individual experience. The impact due to change in morbidity (column D) was developed in Section 6.

HIOS Issuer ID: 46944 37 of 90

| | | | |

CSR Adjustment Factor

Given that the federal government will not fund the CSR program in 2023, BCBSAL has made provisions in the development of its Plan Adjusted Index Rates.

HIOS Issuer ID: 46944 39 of 90

A small amount of what would have been the 2023 CSR amounts are related to limited cost sharing and no cost sharing CSR variation plans for eligible American Indians and Alaska Natives for all exchange plans. These CSR amounts are projected to be of incurred claims based on 2021 experience.

Exhibits 13.5 and 13.6 show the development of the CSR Adjustment Factor for the QHP Silver plans for 2023.

HIOS Issuer ID: 46944 40 of 90

HIOS Issuer ID: 46944 41 of 90

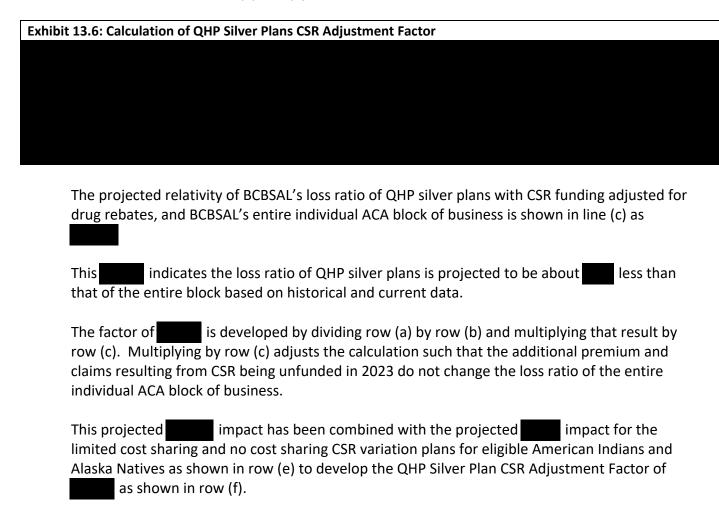

Projected CSR amounts by QHP silver plan variation are calculated by developing projected 2023 allowed PMPMs, paid to allowed ratios with and without CSR funding, and average members.

The projections in column A were developed from the 2021 allowed PMPMs by plan. The projected paid to allowed ratios were developed from the 2021 paid to allowed ratios by plan with modeled impacts of trend and cost sharing benefit changes between the 2021 and 2023 plans. The projected 2023 average members by plan variation were developed from actual enrollment through May 2022, historical changes in enrollment by plan variation, and expected changes in enrollment by plan variation.

HIOS Issuer ID: 46944 42 of 90

Exhibit 13.6 shows the development for the CSR Adjustment Factor for the QHP silver plans. The values shown in lines (a) and (b) of Exhibit 13.6 have been taken from Exhibit 13.5.

HIOS Issuer ID: 46944 43 of 90

Section 14: Administrative Costs

BCBSAL evaluated administrative expenses for all lines of business including Individual ACA.

Administrative expenses were reviewed on: (i) per capita, and (ii) percent of premium basis for prior time periods.

The administrative expense assumption was developed from this analysis and converted to a percent of premium.

Considerations for the 2023 administrative expense assumption include, but are not limited to:

- Administrative expenses for the corporation, and historical changes,
- Administrative expenses by line of business, and expenses allocated to Individual ACA, and
- Ongoing maintenance, requirements, and future improvements in health plan administration (for Individual ACA), and medical management programs applicable to Individual ACA.

Exhibit 14.1 shows the non-benefit expense components for 2023. Assumptions for 2022 are listed for reference only.

| Exhibit 14.1: Components of Total URRT Retention | | | | |
|--|-------------------|------|--|--|
| | Retention Factors | | | |
| Component | 2022 | 2023 | | |
| Administrative Expenses | | | | |
| Contribution to Surplus & Risk Margin | | | | |
| Taxes and Fees (from Exhibit 14.2) | | | | |
| Total URRT Retention | | | | |

URRT retention components are rounded to four decimal places (or two decimal places for a number expressed as a percentage).

HIOS Issuer ID: 46944 44 of 90

Exhibit 14.2 shows the taxes and fees components for 2023. The taxes and fees components for 2022 are listed for reference only.

| Exhibit 14.2: Components of Taxes and Fees | | | | | | |
|--|----------|-----------|--|--|--|--|
| | Retentio | n Factors | | | | |
| Component | 2022 | 2023 | | | | |
| State Premium Tax | | | | | | |
| Health Insurer Fee | | | | | | |
| Risk Adjustment User Fee | | | | | | |
| Patient-Centered Outcomes Research Institute (PCORI) Fee | | | | | | |
| Total Taxes and Fees | | | | | | |

Totals for taxes and fees are rounded to four decimal places (or two decimal places for a number expressed as a percentage).

Taxes and Fees (expressed as a percent of premium):

State Taxes – state premium tax established by state law as 1.60% percent of premium.

• State Premium Tax

1.60%

ACA Taxes and Fees – applicable to the Individual Market as defined by the ACA.

• Health Insurer Fee

0.00%

For calendar year 2021 and after, the Further Consolidated Appropriations Act of 2020 repealed the Health Insurer Fee which would have otherwise been assessed for calendar year 2023.

Risk Adjustment User Fee

The HHS Notice of Benefit and Payment Parameters for 2023 established the 2023 risk adjustment user fee at \$2.64 PMPY or \$0.22 PMPM. This converts to approximately of BCBSAL's 2023 projected individual non-grandfathered premium.

Patient-Centered Outcomes Research Institute (PCORI) Fee

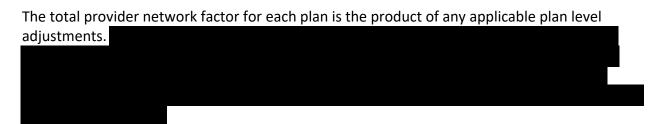

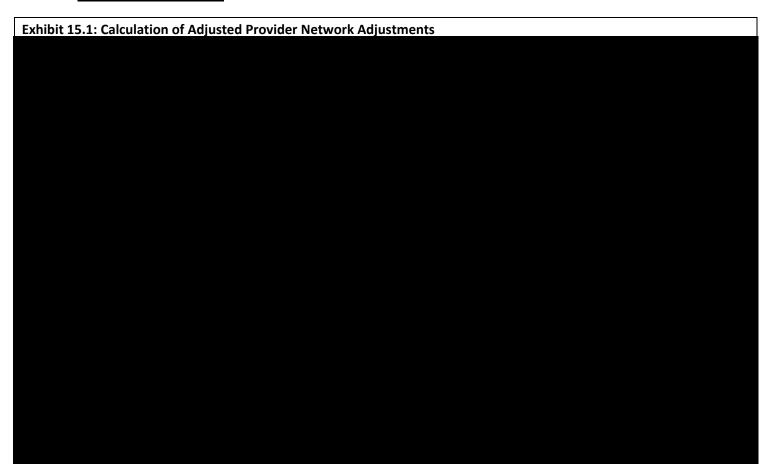

The IRS indicated a PCORI fee of \$2.79 PMPY for plan years ending on or after 10/01/2021 and before 10/01/2022. By applying projected inflation, a projected PCORI fee of \$3.03 PMPY was developed for plan years ending 12/2023. This converts to approximately of BCBSAL's 2023 projected individual nongrandfathered premium.

HIOS Issuer ID: 46944 45 of 90

Section 15: Other Plan Level Adjustments

Provider Network Adjustment

Catastrophic Factor

Using the Milliman Managed Care Rating Model, BCBSAL modeled the Catastrophic plan benefits using standard demographic assumptions and then modeled the benefits using demographics for the Catastrophic plan. The modeled incurred PMPM using expected demographics for the Catastrophic plan was lower than the modeled incurred PMPM using standard demographics.

HIOS Issuer ID: 46944 46 of 90

| CMS age factors only account for a | reduction to premium between the standard | | | | |
|---|---|------------------|-------------------|--|--|
| demographics and the expected catastro | phic demographics. | The catastrophic | factor is used to | | |
| account for the additional premium decr | ease needed to refle | ct the full | difference | | |
| between the two populations. | | | - | | |

| This factor is calculated as | |
|------------------------------|--|
| Catastrophic factor = | |

The Catastrophic factor was then rounded to a factor of Exhibit 15.2 shows the Catastrophic factors by plan. All metal level plans have a factor of 1.0 as instructed by the URRT.

| Exhibit 15.2: Catastrophic Fac | Exhibit 15.2: Catastrophic Factors | | | | | |

| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

Section 16: Plan Adjusted Index Rates

The Plan Adjusted Index Rates were developed from the Market Adjusted Index Rate using the following adjustment factors:

- Actuarial value and cost-sharing design (Section 13)
 - Paid to allowed adjustment factor,
 - Expected utilization differences due to differences in cost sharing labeled below in Exhibit 16.1 as induced utilization, and
 - CSR adjustment factor to fund the CSR program in 2023.
- Adjustment for administrative costs excluding exchange user fees (Section 14)
- Other plan level adjustments (Section 15)
 - Provider Network
 - o Impact of specific eligibility categories for the catastrophic plan

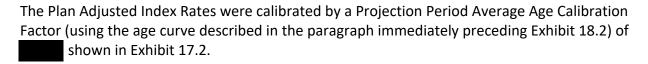

Exhibit 16.1 provides details for the plan-specific plan adjusted index rate calculations. Unrounded values were used to calculate the Plan Adjusted Index Rates. The Plan Adjusted Index Rates in Exhibit 16.1 do not match exactly to the Plan Adjusted Index Rates in the URRT due to URRT rounding requirements.

| | | | | | | | | | |

Section 17: Calibration

The Plan Adjusted Index Rates are calibrated in this section to an age rating factor of 1.0, a geographic area factor of 1.0, and a tobacco factor of 1.0.

Age Calibration:

This factor of is different from the 2023 Projection Period Average Age Factor of shown in Exhibit 7.3 of section 7, as the accounts for members for whom no premium is paid due to the cap of the three oldest child dependents under age 21.

The monthly Adjusted Average Age Factors shown in Exhibit 17.1 were calculated by applying a factor of zero for the members for whom no premium is paid.

These monthly Adjusted Average Age Factors were compared to the monthly Average Age Factors calculated in Exhibit 7.2 of Section 7. The average percent difference between the two factors was which can be seen in Exhibit 17.1.

This was applied to the projected Average Age Factors in Exhibit 7.3 of Section 7 to calculate the monthly Projected Adjusted Average Age Factors shown in Exhibit 17.2.

The 2023 Projection Period Average Age Calibration Factor of was developed in Exhibit 17.2 as the member weighted average of the monthly 2023 projected Adjusted Average Age Factors.

2023 Projection Period Average Age Calibration Factor =

Area Calibration:

The Plan Adjusted Index rates were also calibrated for the Projection Period

Average Area Factor of . The details of the development of BCBSAL's projected Individual are shown in Section 7.

Tobacco Calibration

The Plan Adjusted Index Rates were also calibrated for the Projection Period Average Tobacco Factor of Tobacco are shown in Section 7.

Calibrated Plan Adjusted Index Rates

The Calibrated Plan Adjusted Index Rate is the Plan Adjusted Index Rate divided by the product of the age curve calibration, area calibration, and tobacco calibration factors. Exhibit 17.3 shows the calculation of the Calibrated Plan Adjusted Index Rates, which equal the 21 year old, rating area 3 (i.e., Birmingham – MSA which has an area factor of 1.000), non-tobacco premium rates for each plan.

The Calibrated Plan Adjusted Index Rates in Exhibit 17.3 do not match exactly to the Calibrated Plan Adjusted Index Rates in the URRT due to URRT rounding requirements.

| Exhibit 17.3: Calculation of Calibrated Plan Adjusted Index Rates | | | | | | |

Section 18: Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is calculated by applying the appropriate area factor, age factor, and tobacco factor to the Calibrated Plan Adjusted Index Rate for a particular plan. The Calibrated Plan Adjusted Index Rates can be found in Section 17.

Below is an example of how to calculate the Consumer Adjusted Premium Rate

- 40 year-old
- Huntsville MSA
- Blue Secure Silver
- Non-smoker

Blue Secure Silver Calibrated Plan Adjusted Index Rate

- x Huntsville MSA factor
- x 40 year-old age factor
- x Non-tobacco factor

Consumer Adjusted Premium Rate

Applicable Rating Factors

Area Premium Factors: The rating areas used are the Alabama geographic rating areas listed in the State of Alabama Department of Insurance Bulletin No. 2013-04, attached in the Appendix of this memorandum. Area premium factors are shown in Exhibit 18.1.

| Exhibit 18.1: Rating Area Premium Factors | | | | |

| 39 | 1.262 | | | | | | |

Tobacco Use Premium Factor: BCBSAL will apply a rating factor of for tobacco users.

As federal law has raised the age at which one can buy tobacco from 18 to 21, members under the age of 21 will all be considered non-tobacco users for rating purposes in 2023.

Family premiums will equal the sum of individual Consumer Adjusted Premium Rates calculated using the appropriate Calibrated Plan Adjusted Index Rates and the rating factors above, with the total premium charged to a family for child dependents under age 21 capped at the sum of the individual Consumer Adjusted Premium Rates for the three oldest child dependents under age 21.

Section 19: Projected Loss Ratio

The projected loss ratio for BCBSAL's 2023 ACA Individual Market excluding grandfathered products is calculated below consistent with the federally prescribed MLR methodology of 45 CFR Part 158, 158.221.

$$MLR = \frac{i+q-s+(n-r)}{p-(t+f)} + c$$

Exhibit 19.1 lists the variables, definitions, the values taken from BCBSAL's projections for its 2023 Individual Market excluding grandfathered products, and the MLR Result.

Exhibit 19.1 reflects the adjustments made for the 2023 unfunded CSR.

| Variable | Definition | Estimated Value |
|----------|--|-----------------|
| i | Incurred claims | |
| q | Expenditures on quality improving activities | |
| S | Transitional reinsurance receipts | |
| n | Risk corridor and risk adjustment related payments | |
| r | Risk corridor and risk adjustment related receipts | |

Section 20: AV Metal Values

The distinction of whether the AV Metal Values included in Worksheet 2 of the URRT were entirely based on the AV Calculator, or whether an acceptable alternative methodology was used to generate the AV Metal Value of one or more plans is provided below in Exhibit 20.1.

| Exhibit 20.1: Individual N | Market – AV Metal Values | 69 | 580 S | |

| | | | | |

¹ Cost sharing reduction plan variations are not included in Exhibit 20.1 as such variations are not separate plans

HIOS Issuer ID: 46944 58 of 90

² Catastrophic plan is not included in Exhibit 20.1 as the use of the AV Calculator was not required

³ Required details of the alternative methodology used are described in BCBSAL's filed document titled, "Blue Cross and Blue Shield of Alabama, 2023 Actuarial Certification of Unique Plan Design Actuarial Values, Small Group and Individual Markets"

Development of Membership Projections

Membership projections (as shown in Exhibit 21.1) were developed using actual enrollment data through May 2022 and modeling monthly enrollment through December 2023, considering new enrollment rates and termination rates.

Membership projections were modeled separately for On Exchange and Off Exchange.

New enrollment rates and termination rates were based on consideration of historical data.

More new members were expected to enroll through the Exchange due to the continued availability of premium subsides and cost sharing reduction (CSR) plans. Considerations for termination rates included the availability of subsidies and CSRs on the Exchange as well as the 90-day grace period.

HIOS Issuer ID: 46944 59 of 90

Section 22: Terminated Plans and Products

No plans have been terminated prior to January 1, 2023 that have experience included in the Single Risk Pool during the experience period.

Section 23: Plan Type

Section 24: Reliance

In the course of premium rate development, the following sources or entities – external to BCBSAL – were referenced or considered in establishing rating assumptions and analysis that support the data in the URRT and resulting final premium rates. All information and analysis considered from the sources or entities were deemed reasonable for their intended purposes.

- Milliman Health Cost Guidelines, Managed Care Rating and Rx Rating Models, health and prescription drug pricing models leased by BCBSAL and adjusted to BCBSAL experience when appropriate.
- Prime Therapeutics, BCBSAL's Pharmacy Benefit Manager (PBM), provided input on drug pricing.
- Centers for Medicare and Medicaid Services (CMS) EDGE server reports supporting ACA Risk Adjustment and High Cost Risk Pool Charges.
- CMS Risk Adjustment transfer reports were used to help develop risk adjustment transfer assumptions in the projection period.
- Alabama Department of Insurance Individual risk adjustment transfer estimates, the number and name(s) of the potential new entrant(s) to the market in 2023, and 2022 competitor market share data.
- State of Alabama Bulletin Nos. 2013-04 and 2020-17 regarding geographic rating areas and age curve.
- HHS Notice of Benefit and Payment Parameters for 2023.
- IRS Notice 2020-84 for PCORI Fee.

Section 25: Actuarial Certification

I, Jill B. Cullen, am Vice President and Chief Actuary for Blue Cross and Blue Shield of Alabama. I am a member of the American Academy of Actuaries, and I am qualified to provide this Actuarial Certification which certifies the following:

- (1) The projected Index Rate is
 - (a) in compliance with all applicable State and Federal Statutes and Regulations 45 CFR 156.80 and 147.102,
 - (b) developed in compliance with the applicable Actuarial Standards of Practice,
 - (c) reasonable in relation to the benefits provided and the population anticipated to be covered, and
 - (d) neither excessive nor deficient,
- (2) The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates. A plan level adjustment to QHP plans for CSR funding was considered an allowable modifier under 156.80(d)(2)(i),
- (3) The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area, and
- (4) The Actuarial Value Calculator was used to determine the AV Metal Values shown in Worksheet 2, Section I of the Part I Unified Rate Review Template for all plans except those specified in the certification. For plans where an alternate methodology was used to calculate the AV Metal Value, the Actuarial Certification submitted in June 2022 with the corresponding QHP form filing and required by 45 CFR 156.135 provides the necessary documentation and signature.

This memorandum and accompanying articles simultaneously satisfy the filing requirements of the ACA, and the filing requirements of the State of Alabama.

The premium rates supported by this memorandum assume that the federal government will not fund the CSR program in 2023. If certainty of funding of the CSR program is provided, the premium rates will need an adjustment.

Additionally, per State of Alabama Department of Insurance Bulletin No. 2022-04, this revised Plan Year 2023 rate filing has been prepared following passage of the Inflation Reduction Act of 2022 which extended enhanced APTC subsidies to 2025.

All analyses were either completed by me, or were performed under my direction and review.

Signed,

Jill B. Cullen, FSA, MAAA

Vice President and Chief Actuary

Blue Cross and Blue Shield of Alabama

TO: All Insurers Writing Health Insurance in Alabama

FROM: Jim L. Ridling

Commissioner of Insurance

DATE: September 01, 2020

RE: Age Curve for the Individual and Small Group Health Insurance Market

EFFECTIVE: Immediate

In the Annual Notice of Benefit and Payment Parameters for 2018 and 45 CFR 147.102(d), the U.S. Department of Health and Human Services defined uniform age bands for rating purposes under section 2701 of the Public Health Service Act. The notice and regulation also allowed States to establish a uniform age rating curve for the individual market, small group market or both markets. The selected age rating curve would specify the relative distribution of rates across all age bands.

For all plans until further notice, Alabama establishes the following for age rating purposes:

- Individual Market shall use Table 1 attached to this Bulletin
- Small Group Market shall use Table 2 attached to this Bulletin.

For questions, please contact Steve Ostlund, Life and Health Actuary, at steven.ostlund@insurance.alabama.gov or (334) 240-4424.

RE:

Federal premium rate reforms - rating areas

EFFECTIVE:

January 1, 2014

Federal premium rate reform requirements regarding age, tobacco use, and geographic rating areas in the individual and small group markets apply in policy or plan years beginning on or after January 1, 2014. 45 C.F.R. § 147.102 (published February 27, 2013).

Health insurance issuers offering individual and small group coverage in Alabama are advised that the rating area "default" referenced in 45 C.F.R. § 147.102(b)(2) applies in Alabama. There will be 13 rating areas in Alabama consisting of the state's 12 metropolitan statistical areas and one rating area comprising all non-metropolitan statistical areas. The appendix lists the rating areas by number and county name.
